

New Features Allow Physicians to Find Answers More Quickly

Get more value from your UpToDate subscription, and help your physicians find the information they need more quickly, by providing additional access points within your institution.

Add the UpToDate search box to your intranet.

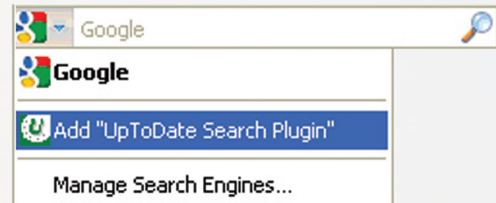

Add the UpToDate search widget (pictured right) to your hospital intranet — in as many locations as you wish — to save your physicians a click and get them to answers faster. Once you've added the widget, no technical maintenance is required.

To take advantage of this new tool and get the search box for your hospital, please contact your IT department and ask them to visit www.uptodate.com/home/profSearchBox.html for instructions.

Make UpToDate your search engine.

Encourage your physicians to search UpToDate for answers (instead of Google) by making UpToDate their search engine. Physicians using Internet Explorer or FireFox can add UpToDate as one of their search options — or even make it their default search engine! Once on the UpToDate website, users just need to click on the down arrow within the browser search box and add UpToDate as a search option.

Benefits

- ✓ **Fast**
Users find clinical answers more quickly because they are brought directly to UpToDate's search results page.
- ✓ **Flexible**
Add the UpToDate widget to your intranet, make UpToDate your preferred search engine — or both!
- ✓ **User-friendly**
The UpToDate search box is so recognizable that users are more likely to see it — and use it!

If you have any questions, please contact your UpToDate Account Manager.
