

Action plan based on the student feedback received in the second semester of the 2024/2025 academic year

Department: Central Library

Faculty: Central organizational unit (independent from the faculties)

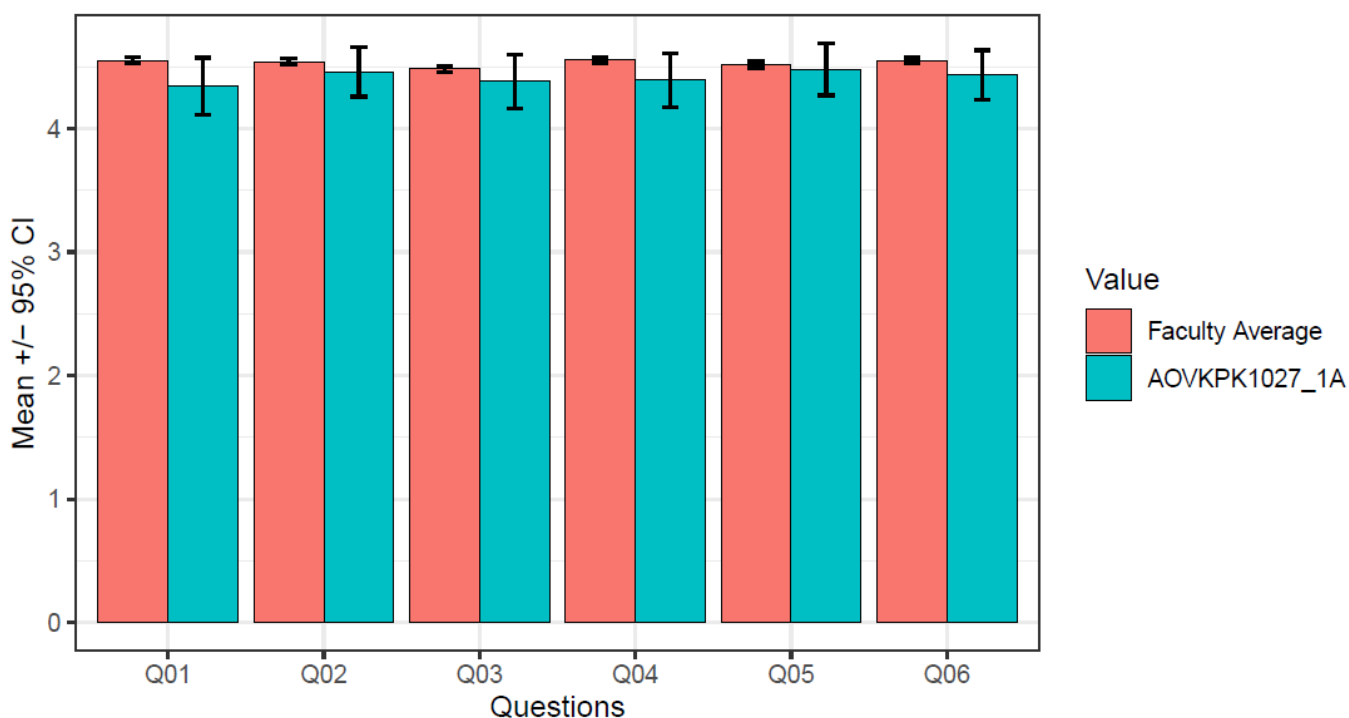

Reflection on the implementation of the previous period's action plan ("implementation review"):

In general, students are satisfied with the content and structure of the course. There is now almost 1 week instead of 24 hours to complete the module tests and automatic saving has been introduced. All this has been well received by the students.

Our feedback on the results of the students' survey:

The questionnaire for Library Informatics (subject code: AOVKPK1027_1A) was completed by more than 40% of the students.

Subject code: AOVKPK1027_1A

The overall result is slightly below the level of faculty average.

We highlight the well-organized teaching of the course (Q02) and the good rating of the Moodle interface of the course (Q05). Various additional materials on the Moodle platform of the subject support the preparation of students' learning. For the other questions, the score was generally as adequate to the faculty average.

QR code feedback is not relevant due to the low completion.

Our feedback on specific comments by the students:

Students' reflections based on the questionnaire:

You said:

„Questions are so difficult”

„just the weekly test question were a bit hard to answer”

Our reply:

Thank you for your feedback. We update the questions of the tests every semester. The uploaded presentations and recordings of the lectures can help you answer the questions in the tests.

Date: 24.07.2025.
