Action plan based on the student feedback received in the first semester of the 2025/2026 academic year

Department: Central Library

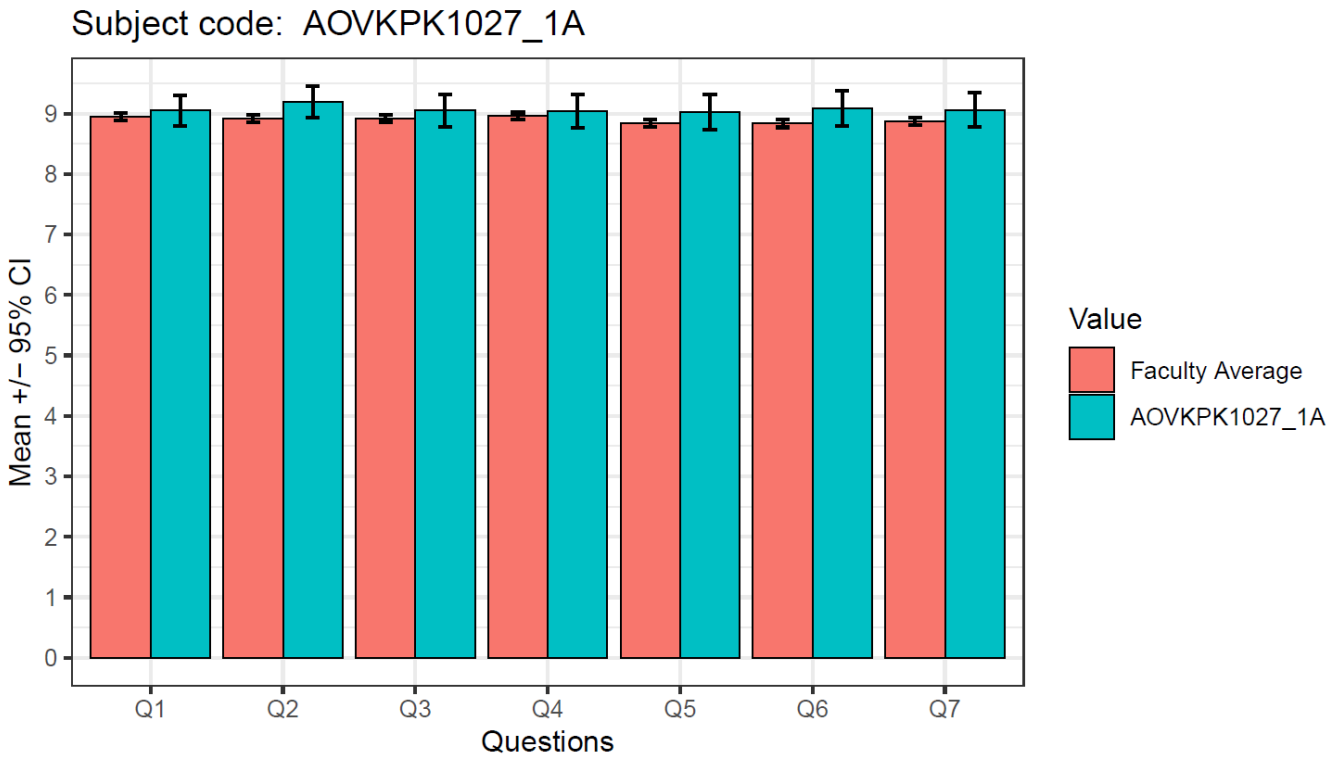

Faculty: Central organizational unit (independent from the faculties)

Reflection on the implementation of the previous period's action plan *("implementation review"):*

In general, students are satisfied with the content and structure of the course. The uploaded presentations and recordings of the lectures can help you answer the questions in the tests.

Our feedback on the results of the students' survey:

The questionnaire for Library Informatics (subject code: AOVKPK1027_1A) was completed by more than 50% of the students.

Unlike in previous years, students were able to express their opinions on a scale of 1 to 10.

The overall result is above the level of faculty average. All the questions recieved above 9 points.

According to the best feedback the requirements for the subject are very transparent; the subject and the course material are easy to follow and structured logically (Q2). There are various additional materials on the Moodle platform of the subject to support the preparation of students' learning and the teacher's work.

Our feedback on specific comments by the students:

Students' reflections based on the questionnaire:

You said:

„make the moodle easier to read"

Our reply:

Thank you for your feedback. The information on Moodle is quite large, you did not specify the content.

You said:

„should communicate better"

Our reply:

Thank you for your feedback. We try our best to answer all of the emails. The most important course information is available on Moodle.

You said:

„moodle tests not eduapp tests - easier to navigate"

Our reply:

Thank you for your feedback. We will consider your suggestion.

You said:

„I think if they could bring the physical classes to a closer location that would be appreciated. But otherwise everything is good."

Our reply:

Thank you for your feedback. Our course is online, there are not physical classes.
