Action plan based on the student feedback received in the second semester of the 2025/2026 academic year

Department: Central Library

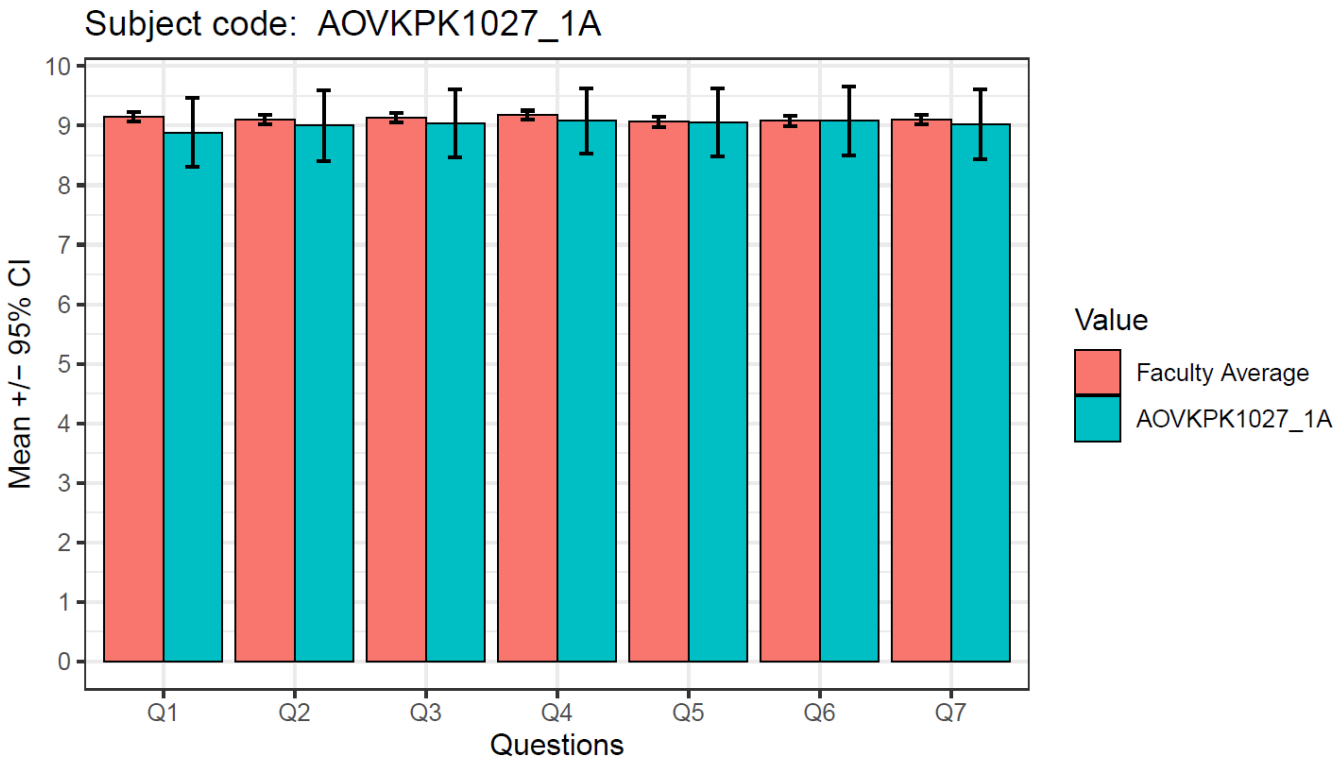

Faculty: Central organizational unit (independent from the faculties)

Reflection on the implementation of the previous period's action plan:

In general, students are satisfied with the content and structure of the course. The transfer of the questions of the module tests to the Moodle interface and plan to make them more comprehensible will take place during the 2026/2027 academic year.

Our feedback and institutional response regarding general comments by the students:

The questionnaire for Library Informatics (subject code: AOVKPK1027_1A) was completed by 24% of the students.

The overall result is generally in line with the faculty average, although only 24% of the students filled out the questionnaire for Library Informatics.
The only score that is below 9 points is the Q1: according to the students' feedback, we could draw more attention to the relationship between the subject and the other courses. Further scores are 9 points or slightly above it, e.g. the course is well organised and adapted to the specific characteristics of the student group (Q5), or the teaching materials related to the subject are easily available and usable for self-study (Q6). There are various additional materials on the Moodle platform of the subject to support the preparation of students' learning and the teacher's work. The module tests will be available on the Moodle interface from the 2026/2027 academic year.

Our feedback and institutional response regarding specific comments by the students:

Students' reflections based on the questionnaire:

You said:

"Weiterhin so unterrichten"

"Good"

"Great"

"Alles gut"

"I thoroughly enjoyed this subject"

"kein Verbesserungsbedarf:)"

"war alles gut"

"Gut"

"It was perfect thank you"

Our reply:

Thank you for your positive feedback.

You said:

"it would be nice if it says on the Moodle about the module tests, and not only on the course description document. There should be more modules too, so that in case you miss one module, you can still get a good grade."

Our reply:

Thank you for your feedback. We will consider your suggestion. The module tests will be available on the Moodle interface from the 2026/2027 academic year.

You said:

„the quizs qbank is not given to students please give it to students”

Our reply:

Thank you for your feedback. At the end of the course, during the study term, students receive a practical grade; there is no exam for this subject during the exam period, so we are not required to share the question bank with the students. We think that the provided study materials are sufficient for successfully completing the module tests.

Date: 27.07.2026.
