# Multimedia: High impact content

**Now it can...** with exclusive newly added video training in ProQuest Nursing & Allied Health Source

ice nurse trainer • 21

Arm length	Arm circumference
<23	<23
<33	<33
<50	<50
<63	<63

Measure over 42cm may be required

**IND BLOOD PRESSURE**

- Raising cuff
- Device (arterial or venous)
- Column or height above or below
- To constrict arm above or below
- To our artery
- If wrong cuff used
- Diastolic: recently
- Tolerated or drunk alcohol
- Cuff

SPHYGMOMANOMETERS  
Traditionally mercury and aneroid

Recording  
• Arm position  
• Observer  
• Influenced by previous readings or an expectation that the level will be normal or raised

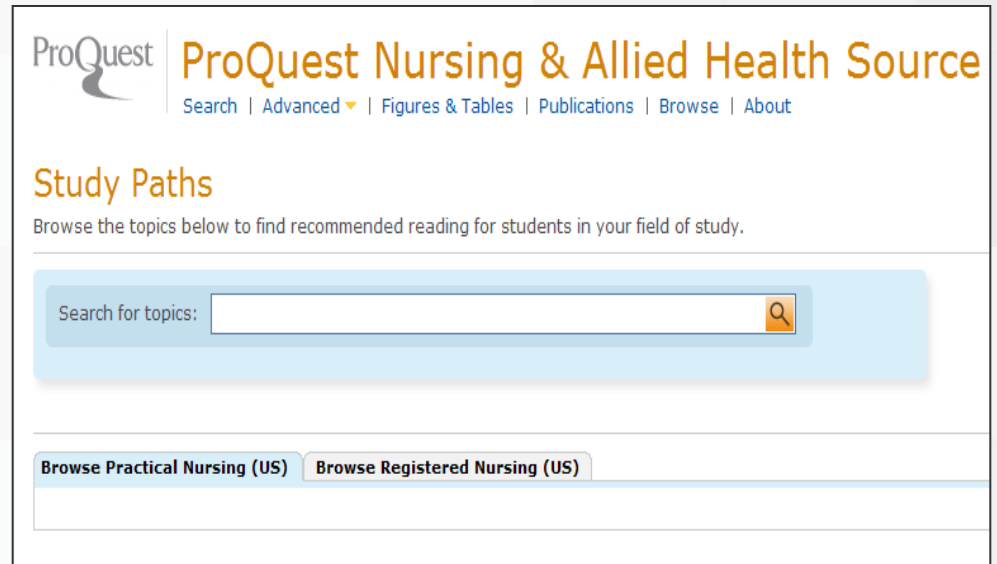

Normal:  $\frac{<120}{<80}$

is developed for measurement of not stand up to hours of daily clinic

# Study Paths

Helps students find the best resources for their study, projects, and examination revision

Study paths created by U.S nurse educators

The screenshot shows the ProQuest Nursing & Allied Health Source website. At the top, the ProQuest logo is on the left, and the site title "ProQuest Nursing & Allied Health Source" is in orange. Below the title are links: Search, Advanced (with a dropdown arrow), Figures & Tables, Publications, Browse, and About. The "Study Paths" section is highlighted in orange. Below it, a subtitle reads: "Browse the topics below to find recommended reading for students in your field of study." There is a search bar with the placeholder text "Search for topics:" and a magnifying glass icon. Below the search bar are two tabs: "Browse Practical Nursing (US)" and "Browse Registered Nursing (US)".

# ProQuest innovation. New ways of searching

## A picture tells a thousand words...

Tables and figures in Health and Medical articles represent the core aspects of a paper: research findings and research data. ProQuest advanced table and figure searching allows researchers to search Health and Medical content more effectively than ever before.

ProQuest's deep indexing of tables and figures allows discovery of the most relevant articles and images. This based on matching search keywords to the index terms we attach to images in documents.

Find out more about how deep indexing of tables and figures powers Health and Medical research at [www.proquest.co.uk/go/deepindex](http://www.proquest.co.uk/go/deepindex).
